DATA MANAGEMENT PLATFORM OF THE YEAR
Radix IoT LLC

Founded in 2020, the goal of Radix IoT has been to empower companies worldwide with a dynamic IoT solution that tackles and solves their biggest and smallest challenges head-on. Established as a leading innovator in the realm of data management, particularly in the context of monitoring globally distributed infrastructure assets at scale, the company's flagship offering, the cloud-native Mango platform, sets it apart from competitors. The versatile and reliable tool has been purpose-built to meet the needs of commercial applications that demand resilience, real-time insights and the capacity to manage expansive portfolios. Radix IoT's Mango platform is indispensable for industries such as hyperscale data centres, telecom, renewable energy and building management, where large-scale, multi-site operations present monitoring and operational challenges.

The success of Radix IoT can be attributed to the strengths of the Mango Platform, currently deployed at more than 35,000 global locations. The platform's intuitive interface and real-time monitoring capabilities are designed to alleviate the challenges associated with managing geographically dispersed operations. The platform's level of scalability and ease of use is essential for sectors that are growing rapidly and face the challenge of managing infrastructure across numerous locations. The hardware and vendor-agnostic architecture of Mango allows it to integrate seamlessly with existing infrastructure and systems, without the need for costly upgrades or replacement, providing businesses with the flexibility to maintain their current investments while enhancing their ability to collect, analyse and act upon data.

The judging panel was particularly impressed by the unique features of the Mango platform, which have made it an exceptional IoT backbone. Judge Osmaan Mahmood commented: "The comprehensive platform enables users to remotely monitor and manage their assets safely and securely. Its user-friendly interface provides a clear view of key performance indicators, asset health and operational issues, enabling users to quickly identify areas that need improvement and respond to potential problems before they escalate. Mango helps to simplify complex asset management and is unquestionably a game changer for large-scale multinational enterprises across a wide range of industries."
